

Overview

HPE Apollo 4500 System

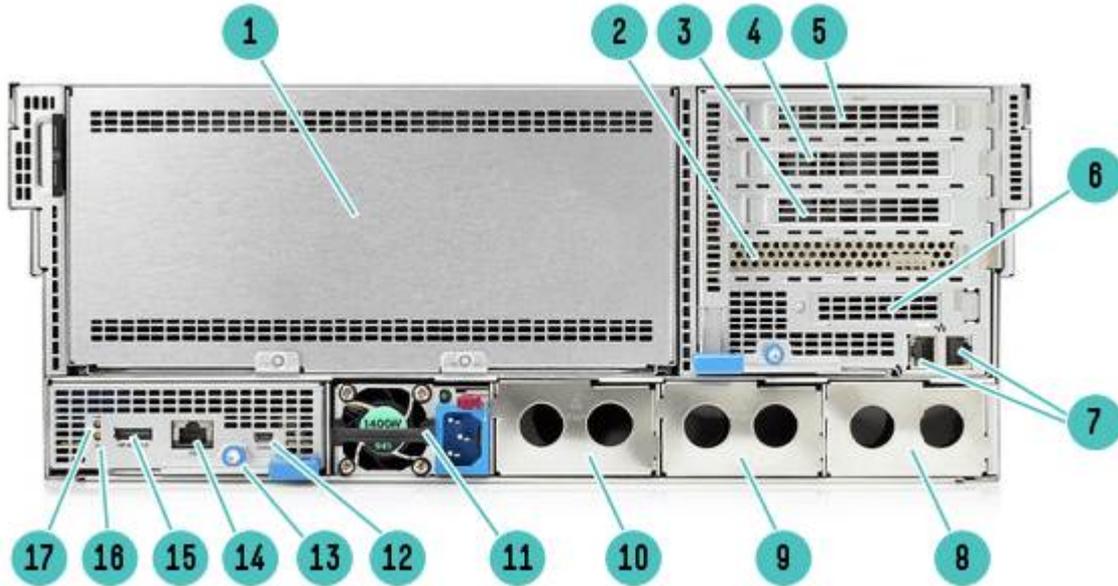

With HPE Apollo 4500 Systems, Hewlett Packard Enterprise challenges the notion that one-size-fits-all for Big Data infrastructure by creating two purpose-built systems that specifically address storage and analytics workloads: the Apollo 4510 and Apollo 4530, respectively. For object storage, the ultra-dense Apollo 4510 includes 1 server and up to 68 Large Form Factor (LFF) in a 4U chassis. For Hadoop analytics, the Apollo 4530 uniquely offers 3 servers per chassis, ideal for housing 3 copies of data in a single system.

What's New

- Intel® Xeon® Processor E5-2600 v3 Series

Overview

- HPE DDR4-2133 Low Voltage Memory Kit
- 4U Form Factor
- Up to 4 PCIe Gen 3.0 Slots
- Up to 68 LFF drives
- M.2 support
- HBA support for node drives
- 16 DIMMs - DDR4 memory
- Gen9 Power supplies (800W and 1400W) - 48VDC
- 12G SAS
- VDC Power Supply Kit

Standard Features

NOTE: For the Standard Features shipped in the Factory Integrated Models, please see the "Configuration Information - Factory Integrated Models" section.

Standard Features

HPE Server ROM

HPE ROM (Read Only Memory) is now digitally signed using HPE's Corporate Signing Service. This signature is verified before the flash process starts, reducing accidental programming and preventing malicious efforts to corrupt system ROM. HPE ROM provides for essential initialization and validation of hardware components before control is passed to the customer-installed operating system. The ROM also provides the capability of booting from various fixed media (HDD, CD-ROM) and removable media (USB), to continue operation to the operating system. HPE ROM performs very early configuration of the video controller, to allow monitoring of initialization progress via an attached monitor. If configuration or hardware errors are discovered during this early phase of hardware initialization, suitable messages are now displayed on the connected monitor. Additionally, these configuration or hardware errors are logged to the Integrated Management Log (IML) to assist in diagnosis.

HPE's ProLiant ROM is used to configure the following:

- Processor and chipset status registers
- System memory, memory map, and memory initialization
- System hardware configuration (Integrated PCI devices and optional PCIe cards).
- Customer-specific BIOS configuration (using the HPE ROM-Based Setup Utility (RBSU)).

NOTE: For further information, please refer to HPE's RBSU (ROM based setup utility) user guide: <http://www.hp.com/support/rbsu>

Storage Controllers Dedicated to each server node

Software RAID

HPE Dynamic Smart Array B140i SATA RAID

NOTE: HPE Dynamic Smart Array B140i SATA RAID is located on the server node and controls the two small form factor (SFF/2.5") hard drives and M.2 drives in the server node itself.

HPE Smart Array P244br/1G FIO Controller

HPE H244br FIO Smart HBA

NOTE: The P244br and H244br may be used for hardware RAID/HBA of the 2 SFF drives per server node.

NOTE: If SAS drive is selected, P244br or H244br is required.

NOTE: NOTE: P244br and H244br connect to the 2 SFF drives in the node and provide capability for up to 12G SAS or 6G SATA. If not installed, then the Intel 610 chipset SATA controls the drives.

NOTE: If you do not wish to use RAID/HBA using software or hardware RAID, then the Intel Chipset controls the RAID. The Intel Chipset is the default controller for the SFF drives.

For hardware RAID/HBA of bulk storage drives, one of the following controlled is required:

HPE Smart Array P440/4G Controller

HPE Smart Array P441/4G Controller

HPE Smart Array P840/4G Controller

HPE Smart Array P841/4G Controller

HPE H240 Smart HBA

Standard Features

NOTE: The above options control the large form factor (LFF/ 3.5") drives.

NOTE: SA/HBA that end in 1 refer to external controllers for storage outside of the system.

0 refers to internal storage

Internal Storage Devices	USB Drive	Via USB port, external support only
	Hard Drives	None ship standard
	Drive Bays	2 SFF drive bays total for each node 68 LFF drive bays total in chassis for a Apollo 4510 model 45 LFF drive bays total in chassis for a Apollo 4530 (15 drives per node)

Maximum Internal Storage	Apollo 4510: 1x68 Model - 68 LFF Drives per node	
	NOTE: To achieve 68 LFF drives, the optional 8 drive rear cage must be purchased	
	NOTE: The default bulk drive support is 60 LFF drives.	
	Hot Plug LFF SAS	544 TB 68 x 8TB
	Hot Plug LFF SATA	544 TB 68 x 8TB
	Hot Plug LFF SAS SSD	108.8 TB 68 x 1.6TB
	Hot Plug LFF SATA SSD	65.3 TB 68 x 960 GB
	Hot Plug SFF SATA SSD	1.6TB 2 x 800GB
	Hot Plug SFF SAS SSD	3.2 TB 2 x 1.6TB
	Hot Plug SFF SATA	2 TB 2 x 1TB
M.2 2280 SSD	680 GB 2 x 340GB	
NOTE: The node consists of two SFF (2.5") hard drive bays on the front of the server		
NOTE: M.2s were not previously available with the SL4500, but are available for the Apollo 4500 Gen9 Systems		
NOTE: The main storage section in the chassis has 60 LFF (3.5") hard drive bays, with an optional rear drive cage (only available on the Apollo 4510) which fits 8 additional LFF drives and they can be populated with any combination of SAS, SATA, or SATA SSD drives to achieve desired performance.		
Apollo 4530: 15 LFF Drives per node, 3 nodes total for a total of 45 LFF Drives per chassis		
Hot Plug LFF SAS	360TB 45x 8TB	
Hot Plug LFF SATA	360TB 45 x 8TB	
Hot Plug LFF SAS SSD	72 TB 45 x 1.6TB	
Hot Plug LFF SATA SSD	43.2TB 45 x 960 GB	
Hot Plug SFF SATA SSD	4.8TB 6 x 800GB	
Hot Plug SFF SAS SSD	9.6 TB 6 x 1.6TB	
Hot Plug SFF SATA	6TB 6 x 1TB	
M.2 2280 SSD	2.04TB 6 x 340 GB	
NOTE: Each node contains two SFF (2.5") hard drive bays on the front of the node.		
NOTE: M.2s were not previously available with the SL4500, but are available for the Apollo 4500 Gen9 Systems		

Standard Features

NOTE: The main storage section in the chassis has 45 LFF (3.5") hard drive bays, 15 bays per node, and they can be populated with any combination of SAS, SATA, or SATA SSD drives to achieve desired performance.

Interfaces Dedicated to each server node	Network RJ-45	Two 1GbE NIC ports NOTE: Customers can elect to use a FlexibleLOM, which enables customers to increase I/O capacity
	Management Network Port	1GbE Dedicated NOTE: Management port is shared (located on management module)
	Health LED	1 front
	Power	1 front
	UID for node	1 front per node and 1 rear on management module
	UID for storage	1 per display board
	SUV	Serial + USB + video (all in one) NOTE: HPE 36pin SUV Dongle Cord Kit P/N is 676277-B21

Industry Standard Compliance	ACPI 5.0 Compliant
	PCIe 3.0 Compliant
	WOL Support
	Microsoft® Logo certifications
	PXE Support
	USB 1.1 and 2.0 Compliant
	SMBIOS 3.0.0

Server Power Cords	6' Highline (IEC-IEC) power cord ships standard NOTE: HPE Apollo servers are primarily connected to PDU's in data center racks so they ship standard with only a PDU power cord (416151-B21). If a user wishes to power an Apollo system using a 120V receptacle (NEMA-15), the NEMA power cord must be ordered separately. NOTE: If customers require a local power cord, they can check the power cord matrix for the appropriate cord. Please see the following power cord matrix: http://www.hp.com/go/powercordmatrix .

Standard Features

Power Specifications To review typical system power ratings use the HPE Power Advisor which is available via the online tool located at URL: <http://www.hp.com/go/proliant-energy-efficient> or <http://www.hp.com/go/hppoweradvisor>.
NOTE: Power Specification and Technical Content for supported power supplies can be found at:
http://h18000.www1.hp.com/products/quickspecs/14209_div/14209_div.html

Common Slot Power Supply HPE's Common Slot (CS) power supplies allow for commonality of power supplies across a wide range of ProLiant and Integrity servers, as well as HPE Storage solutions, and are designed to provide the highest power supply efficiency without degrading system performance. HPE CS power supplies are tested by the Electric Power Research Institute (EPRI) and certified through the ECOS 80 Plus power supply program. HPE CS power supply options provide efficiency ratings of up to 94% and are available in two power output options - 800W, and 1400W - allowing the user to "right-size" a power supply for their specific server configuration. All HPE Common Slot power sources are UL, CE Mark Compliant, hot-plug and support redundant configurations. It is highly recommended that you use the HPE Power Advisor in defining the "Right-Size" power supply for your needs. HPE Power Advisor can be accessed at: <http://www.hp.com/go/hppoweradvisor>.
NOTE: Mixing of power supplies in the same server is not supported. All power supplies must be of the same output and efficiency rating. If non-matched power supplies are inserted you will get errors and operation will fail.
NOTE: The 80 PLUS program is a unique forum that unites electric utilities, the computer industry, and consumers in an effort to bring energy efficient technology solutions to the marketplace. 80 Plus independently tests power supply efficiency and publicly posts the results on <http://www.80Plus.org>.
NOTE: Redundant Power: Optional redundant power supplies can be purchased through power supply option kits (see Power Supplies for part numbers).

System Fans System ships standard with 5 hot-plug fan modules.

On System Management HPE iLO Management Engine

HPE iLO Management Engine is a comprehensive set of embedded management features supporting the complete lifecycle of the server, from initial deployment, through ongoing management, to service alerting and remote support. HPE iLO Management Engine comes standard on all HPE ProLiant Gen9 servers. The HPE iLO Management Engine portfolio includes:

- HPE iLO Mobile App: Enables the ability to access, deploy, and manage your server anytime from anywhere from select smartphones and mobile devices. For additional information please visit: <http://www.hp.com/go/ilo/mobileapp>
- HPE iLO: The HPE iLO (Integrated Lights-Out) management processor is the core foundation for the HPE iLO Management Engine
- HPE Agentless Management: Provides built in server health monitoring and alerting capability without OS agents, that starts working the moment a power cord and an Ethernet cable are connected.
- HPE Active Health System: Always on, continuous monitoring for increased stability and shorter downtimes; 100% configuration history; Health and service alerts and easy export and upload to Service and Support.
- HPE Intelligent Provisioning: Lets customers provision and configure a single server without any separate media. No more SmartStart CDs or Smart Update

Standard Features

Firmware DVD are needed.

- To start Intelligent Provisioning:

- Press the F10 key during the ProLiant Gen9 server boot process (also known as power on self-test or POST).
- Press the F10 key during the ProLiant Gen9 server boot process (also known as power on self-test or POST).
- Please go to the Intelligent Provisioning website at <http://www.hp.com/go/intelligentprovisioning> for additional information and to view usage videos.
- Use the Service Pack for ProLiant (SPP) at <http://www.hp.com/go/spp> to get firmware and software updates.
- **NOTE:** For more information, visit: <http://www.hp.com/go/ilo> or HPE iLO Management Engine technologies whitepaper

HPE Insight Management

HPE Service Pack for ProLiant

HPE Service Pack for ProLiant (SPP) and HPE Smart Update Manager (HPE SUM) provide a comprehensive approach to firmware and system software maintenance. Together they provide better operating stability and ensure maximum uptime. The SPP will be updated at a predictable cadence, typically coinciding with new Hewlett Packard Enterprise server hardware launches. By enabling firmware to be updated online and integrating firmware and system software updates in one operation, HPE SUM and the SPP offer faster updates of individual servers and dramatically faster updates of entire BladeSystem enclosures. Further improving system uptime and stability is the fact that Hewlett Packard Enterprise provides 12 months of support for each Service Pack for ProLiant release.

The user experience around HPE SUM and the SPP has been improved in several ways, starting with the web download. A single web page provides access to a single download containing both the latest version of HPE SUM and the latest SPP. Optional smaller subsets with only specific types of servers or specific operating systems are offered to save on download time. The HPE SUM application provides a straightforward, intuitive user interface that guides the user through the steps of discovery, analyses and update, providing comprehensive information on available updates, criticality and interdependencies. This information is also available in reports. By providing the option of multiple local or shared repositories which can be easily updated from hpe.com, HPE SUM provides the tools to optimize stability and consistency

Standard Features

throughout the company. While HPE SUM and the SPP recommend the combinations of firmware and system software that HPE has found to be the best practice, the application gives customers the flexibility to set their own specific baseline. The Service Pack for ProLiant has been rigorously tested with specific attention for interaction between firmware, drivers and agents both within the server as well as in interaction with the BladeSystem enclosure components (Onboard Administrator and Virtual Connect). This testing ensures the highest quality as well as providing the input for HPE SUM to deploy updates taking into account all interdependencies, when determining the correct updates and order of update deployment.

NOTE: The Service Pack for ProLiant (which includes HPE SUM) can be downloaded from <http://www.hp.com/go/spp/download>. More information can be found: <http://www.hp.com/go/SmartUpdate>, <http://www.hp.com/go/spp> and <http://www.hp.com/go/hpsum>

Warranty

This product is covered by a global limited warranty and supported by Hewlett Packard Enterprise Services and a worldwide network of Hewlett Packard Enterprise Authorized Channel Partners resellers. Hardware diagnostic support and repair is available for three years from date of purchase. Support for software and initial setup is available for 90 days from date of purchase. Enhancements to warranty services are available through HPE Care Pack services or customized service agreements. Hard drives have either a one year or three year warranty; refer to the specific hard drive QuickSpecs for details.

NOTE: Server Warranty includes 1-Year Parts, 1-Year Labor, 1-Year Onsite support with next business day response. Warranty repairs may be accomplished through the use of Customer Self Repair (CSR) parts. These parts fall into two categories: 1) Mandatory CSR parts are designed for easy replacement. A travel and labor charge will result when customers decline to replace a Mandatory CSR part; 2) Optional CSR parts are also designed for easy replacement but may involve added complexity. Customers may choose to have Hewlett Packard Enterprise replace Optional CSR parts at no charge. Additional information regarding worldwide limited warranty and technical support is available at: <http://h18004.www1.hp.com/products/servers/platforms/warranty/index.html>

Optional Features

HPE Insight management	HPE Insight Control	<p>HPE Insight Control, a product option, delivers essential infrastructure management that can help save time and money by making it easy to deploy, migrate, monitor, remote control, and optimize your IT infrastructure through a single, simple management console. For more information, see http://www.hp.com/go/insightcontrol.</p> <p>HPE Insight Control includes one year of 24 x 7 HPE Software Technical Support and Update Service ensuring rapid access to HPE support staff and proactive delivery of software updates. For more information about this service, see: http://www.hp.com/services/insight.</p>
	HPE iLO Advanced	<p>HPE Integrated Lights-Out Advanced License a product option, providing smart remote server management without compromise. iLO Advanced unlocks the full set of remote administration functionality for all HPE ProLiant servers by activating the full Virtual Keyboard Video and Mouse remote console, multi-user collaboration, console record and replay, GUI-based and scripted virtual media and virtual folders, and enhanced security and power management functionality. For more information, see: http://www.hp.com/go/ioloadvance</p>
	HPE Matrix Operating Environment	<p>The HPE Matrix Operating Environment (Matrix OE) for ProLiant and Integrity servers is an integrated command center that helps you instantly adjust to dynamic business demands. This advanced infrastructure management software lets you reduce the cost of common data center tasks by up to 40 percent while keeping pace with your changing business. The HPE Matrix OE includes the automated provisioning, optimization, and recovery management capabilities for HPE CloudSystem Matrix, the ideal platform for private cloud and Infrastructure as a Service (IaaS).</p> <p>NOTE: For more information, visit: http://www.hp.com/go/matrixoe</p>

Optional Features

High Performance Clusters	HPE HPC Interconnects	High Performance Computing (HPC) interconnect technologies are available for this server. These high-speed InfiniBand and 10 Gigabit interconnects are fully supported by HP. http://www.hp.com/techservers/clusters/ucp/index.html
	HPE Insight Cluster Management Utility	HPE Insight Cluster Management Utility (CMU) is an HPE-licensed and HPE-supported suite of tools that are used for lifecycle management of hyperscale clusters of Linux ProLiant systems. CMU includes software for the centralized provisioning, management and monitoring of nodes. CMU makes the administration of clusters user friendly, efficient, and effective. http://www.hp.com/go/cmu
	HPE HPC Linux Value Pack	HPE HPC Linux Value Pack (Value Pack) is an HPE-licensed and HPE-supported option to HPE Insight CMU, for the development and deployment of applications on HPC Cluster Platforms. Value Pack includes the Platform LSF workload scheduler and Platform Application Center, as well as the HPE-MPI parallelization library.

HPE Insight Online	HPE Insight Online is a new addition to the HPE Support Center for one stop, secure access to product and HPE support information personalized to your IT environment. Service and Support

- Service and Support** HPE Technology Services for Apollo Servers
HPE Technology Services delivers confidence, reduces risk and helps customers realize agility and stability. Connect to Hewlett Packard Enterprise to help prevent problems and solve issues faster. Our support technology lets you to tap into the knowledge of millions of devices and thousands of experts to stay informed and in control, anywhere, any time.
Protect your business beyond warranty with HPE Care Pack Services
HPE Care Pack Services enable you to order the right service level, length of coverage and response time as you purchase your new server, giving you full entitlement for the term you select.
-
- Optimized Care** Supports maintaining servers at optimum performance availability
HPE Proactive Care with 24x7 coverage, three year Care Pack Service
HPE Proactive Care helps prevent problems and stabilize IT by utilizing secure, real-time, predictive analytics and proactive consultations when your products are connected to Hewlett Packard Enterprise. This Care Pack Service combines three years' proactive reporting and advice with our 24x7 coverage and enhanced escalation management, four hour hardware response time and two hour call back for software questions on leading industry standard software running on your HPE ProLiant server. <http://h20195.www2.hp.com/v2/GetPDF.aspx/4AA3-8855ENW.pdf>
- Standard Care** Supports maintaining high level of server availability
Foundation Care 24x7, three-year Care Pack Service
HPE Foundation Care 24x7 connects you to HPE 24 hours a day, seven days a week for assistance on resolving issues. Hardware onsite response within four hours if needed; collaborative software included in this Care Pack service provides troubleshooting assistance on industry leading software running on your HPE server. Simplify your support experience and make Hewlett Packard Enterprise your first call for hardware or software questions.

Data Center Platform Consulting Services

Service and Support

Choose HPE Technology Services Consulting to modernize and migrate your key systems. These services help fine tune your data center to improve security, management and efficiency across IT infrastructure, operations, and facilities and prepare you for the new style of IT. Hewlett Packard Enterprise understands the needs of the data center of the future and will serve as your guide for the journey. <http://www.hp.com/services/consulting>

Connect your devices to Hewlett Packard Enterprise

Unlock all of the benefits of your technology investment by connecting your products to Hewlett Packard Enterprise. Achieve up to 77% reduction in down time, near 100% diagnostic accuracy and a single consolidated view of your environment. By connecting, you will receive 24x7 monitoring, pre-failure alerts, automatic call logging, and automatic parts dispatch. HPE Proactive Care Service and HPE Datacenter Care Service customers will also benefit from proactive activities to help prevent issues and increase optimization. All of these benefits are already available to you with your server storage and networking products, securely connected to HPE support.

HPE Support Center

Personalized online support portal with access to information, tools and experts to support Hewlett Packard Enterprise business products. Submit support cases online, chat with Hewlett Packard Enterprise experts, access support resources or collaborate with peers. Learn more <http://www.hp.com/go/hpsc>
HPE's Support Center Mobile App* allows you to resolve issues yourself or quickly connect to an agent for live support. Now, you can get access to personalized IT support anywhere, anytime.
HPE Insight Remote Support and HPE Support Center are available at no additional cost with a HPE warranty, HPE Care Pack or HPE contractual support agreement.

Warranty / Service Coverage

For ProLiant servers and storage systems, the services cover HPE-branded hardware options qualified for the server, purchased at the same time or afterward, internal to the enclosure, as well as external monitors up to 22" and tower UPS products; these items will be covered at the same service level and for the same coverage period as the server unless the maximum supported lifetime and/or the maximum usage limitation has been exceeded. Coverage of the UPS battery is not included; standard warranty terms and conditions apply.
The defective media retention service feature option applies only to Disk or eligible SSD/Flash Drives replaced by Hewlett Packard Enterprise due to malfunction. It does not apply to any exchange of Disk or SSD/Flash Drives that have not failed. SSD/Flash Drives that are specified by Hewlett Packard Enterprise as consumable parts and/or that have exceeded maximum supported lifetime and/or the maximum usage limit as set forth in the manufacturer's operating manual or the technical data sheet are not eligible for the defective media retention service feature option.

Configuration Information - Factory Integrated Models

NOTE: This section lists some of the steps required to configure a Factory Integrated Model. To ensure only valid configurations are ordered, Hewlett Packard Enterprise recommends the use of a Hewlett Packard Enterprise approved configurator. Contact your local sales representative for information on configurable product offerings and requirements.

NOTE: Factory Integrated Models must start with a CTO Server.

NOTE: FIO indicates that this option is only available as a factory installable option.

NOTE: All Factory Integrated Models will be populated with sufficient hard drive blanks based on the number of initial hard drives ordered with the server.

NOTE: Rack chosen is required to have 1200mm to provide space for cable management arm at the rear of the chassis and host PDU in the rear of the rack

Step 1: Base Configuration (choose one of the following configurable models)

HPE Chassis - Apollo 4510 Model	<p>HP Apollo 4510 Gen9 Configure-to-order Chassis 799581-B21</p> <p>NOTE: Standard 5 hot-plug fan modules included in the chassis.</p> <p>NOTE: Supports up to 68 LFF drives (rear drive cage kit required). One node total</p>
HPE Chassis - Apollo 4530 Model	<p>HPE Apollo 4530 Gen9 CTO Chassis 799581-B23</p> <p>NOTE: Standard 5 hot-plug fan modules included in the chassis.</p> <p>NOTE: Supports 45 LFF drives with up to 15 per node. Three nodes total</p>
HPE Power Supplies	<p>NOTE: Prior to making a power supply selection it is highly recommended that the HPE Power Advisor is run to determine the right size power supply for your server configuration. The HPE Power Advisor is located at: http://www.hp.com/go/hppoweradvisor</p> <p>HPE Flex Slot Titanium Power Supply Kits</p> <p>NOTE: The following power supplies offer up to 94% efficiency.</p> <p>HPE 800W FS Ti Ht Plg Pwr Supply Kit 720482-B21</p> <p>HPE Flex Slot Platinum Plus Power Supply Kits</p> <p>NOTE: The following power supplies offer up to 94% efficiency.</p> <p>HP 800W Flex Slot Platinum Hot Plug Power Supply Kit 720479-B21</p> <p>HP 1400W Flex Slot Platinum Plus Hot Plug Power Supply Kit 720620-B21</p> <p>HPE Flex Slot Slot Power Supplies</p> <p>NOTE: The following power supplies offer up to 94% efficiency.</p> <p>HP 800W Flex Slot -48VDC Hot Plug Power Supply Kit 720480-B21</p> <p>HP 800W Flex Slot Universal Hot Plug Power Supply Kit 720484-B21</p> <p>NOTE: Kits contain optional power supply, an IEC power cable and PDU IEC cables.</p>
HPE Rail Kits	<p>NOTE: One Rail Kit is required for every chassis in a rack.</p> <p>HP 4.3U Server Rail Kit 681254-B21</p> <p>NOTE: *This is the same rail kit that was used in the HPE ProLiant SL4540 Gen8 Server.</p>
HPE Rack Adapter Kits	<p>HP 4.3U Rack Adapter Kit 744697-B21</p>

Configuration Information - Factory Integrated Models

HPE Advanced Power Manager	<p>The Advanced Power Manager is an optional rack level solution for the HPE Apollo 4500 Systems which enable server-level DC (or hardware) power on and off and server-level monitoring. In addition, the APM will automatically discover hardware components which are connected into the APM solution. The APM does not replace rack PDUs, but is designed to enable the utilization of basic, low cost, rack PDUs while providing the functionality of 'switched' PDUs (which provide hardware power on/off of individual servers by turning off the AC power to the power supplies of a given server). Because the servers share power supplies to optimize power efficiency, using 'switched' PDUs to turn off all the power supplies in the chassis will result in the loss of all server nodes in that chassis. The APM solves this by allowing server node-level hardware power on/off of the DC power to the individual server node motherboards.</p>

NOTE: The TPM (Trusted Platform Module) is a microcontroller chip that can securely store artifacts used to authenticate the server platform. These artifacts can include passwords, certificates and encryption keys. Windows® BitLocker™ Drive Encryption (BitLocker) is a data protection feature available in Windows Server® 2008. BitLocker leverages the enhanced security capabilities of a Trusted Platform Module (TPM) version 1.2. The TPM works with BitLocker to help protect user data and to ensure that a server running Windows Server 2008 has not been tampered with while the system was offline. For more information about TPM, including a white paper, go to: <http://www.hp.com/go/TPM>.

NOTE: ProLiant OS pre-installed units will come with the partition required for TPM deployment.

NOTE: The TPM key is unique to every TPM deployed server and must be retained. Misplacing or losing the key could result in data loss.

NOTE: Memory configurations listed do not apply to "Factory Integrated Models".

NOTE: Chart does not represent all possible memory configurations.

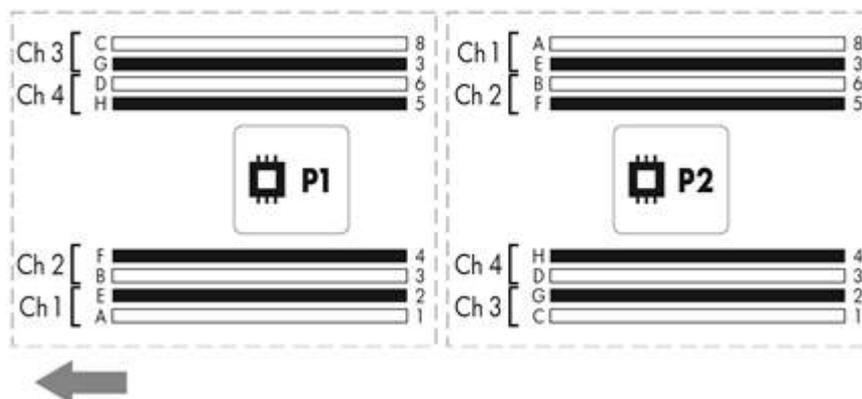

For detailed memory configuration rules and guidelines, please use the Online DDR4 Memory Configuration Tool: <http://www.hp.com/go/ddr4memory-configurator>

Memory Subsystem Architecture

Each Intel® Xeon® E5-2600 family processor socket contains four memory channels that support two DIMMs each for a total of eight (8) DIMM per installed processor or a grand total of sixteen (16) DIMMs for the server. Up to 32GB capacity DIMMs are supported for 512GB of memory (16 DIMM slots x 32GB per DIMM).

DIMM slot and configuration diagrams

Configuration Information - Factory Integrated Models

Memory population guidelines

General Memory Population Rules and Guidelines:

- Light DIMM slots denote the first slot of a channel. For 1 DPC (DIMM per channel) populate light slots only.
- Install DIMMs only if the corresponding processor is installed.
- If only one processor is installed in a two processor system, only half of the DIMM slots are available.
- To maximize performance, it is recommended to balance the total memory capacity between all installed processors and to load the channels similarly whenever possible.
- Populate DIMMs from heaviest load (dual-rank) to lightest load (single-rank) within a channel. Heaviest load (DIMM with most ranks) within a channel goes furthest from the processor
- The maximum memory speed is a function of the memory type, memory configuration, and processor model.
- The maximum memory capacity is a function of the memory type and number of installed processors.
- HPE memory from previous generation servers is not qualified on the HPE Apollo 4530 and Apollo 4510 Gen9 Systems. Certain HPE SmartMemory features such as memory authentication and enhanced performance may not be supported.
- To realize the performance memory capabilities listed in this document, HPE SmartMemory is required. For additional information, please see the HPE SmartMemory QuickSpecs at: http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html.

NOTE: Memory Speed is a function of the processor QBI bus speed.

*Maximum capacity will vary based on individual server platform qualification schedule.

NOTE: Capacity references are rounded to the common Gigabyte Values:

- 4GB = 4096 MB
- 8GB = 8192 MB
- 16GB = 16384 MB
- 32GB = 32768 MB

DDR4 memory options part number decoder

Configuration Information - Factory Integrated Models

Following are memory options available from HP:

HPE Memory

NOTE: Please choose memory options for socket 2 of each server node.
Up to 8 DDR4 DIMM slots dedicated per socket.

NOTE: HPE SmartMemory is required to realize the memory performance improvements and enhanced functionality listed in this document for Gen9. For additional information, please see the HPE SmartMemory QuickSpecs at:

http://h18000.www1.hp.com/products/quickspecs/14225_div/14225_div.html

NOTE: HPE certified SmartMemory must be used to guarantee full 2133MHz speeds.

NOTE: Depending on the memory configuration and processor model, the memory speed may run at 2133MHz, 1866MHz or 1600MHz. Please see the Online Memory Configuration Tool at: <http://www.hp.com/go/ddr4memory-configurator>.

To recycle your product, please go to: <http://www.hp.com/go/green> or contact your nearest Hewlett Packard Enterprise sales office. Products returned to Hewlett Packard Enterprise will be recycled, recovered or disposed of in a responsible manner. The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard Enterprise web site at: <http://www.hp.com/go/green>. These instructions may be used by recyclers and other WEEE treatment facilities as well as Hewlett Packard Enterprise OEM customers who integrate and re-sell Hewlett Packard Enterprise equipment.
